In lieu of the matter proposed to be inserted, insert the following:

1 SECTION 1. SHORT TITLE.
2 This Act may be cited as the “Workplace Violence Prevention for Health Care and Social Service Workers Act”.

5 SEC. 2. FINDINGS.
6 Congress finds the following:
7 (1) In a 2016 report entitled, “Workplace Safety and Health: Additional Efforts Needed to Help Protect Health Care Workers from Workplace Violence”, the Government Accountability Office estimated over 730,000 cases of health care workplace assaults over the 5-year span from 2009 through 2013, based on Bureau of Justice Statistics data.
8 (2) The Bureau of Labor Statistics reported the health care and social service industries experience the highest rates of injuries caused by workplace violence. Nurses, social workers, psychiatric, home
health, and personal care aides are all at increased risk for injury caused by workplace violence.

(3) The Bureau of Labor Statistics reports that health care and social service workers suffered 71 percent of all workplace violence injuries caused by persons in 2017 and are more than 4 times as likely to suffer a workplace violence injury than workers overall.

(4) According to a September 2018 survey of 3,500 American emergency physicians conducted by the American College of Emergency Physicians, 47 percent of emergency room doctors have been physically assaulted at work, and 8 in 10 report that this violence is affecting patient care.

(5) Workplace violence in health care and social service sectors is increasing. Bureau of Labor Statistics data show that private sector injury rates of workplace violence in health care and social service sectors increased by 63 percent between 2006 and 2016.

(6) Studies have found that proper staff education and the use of evidence based interventions (such as effective communication with patients using de-escalation techniques and noncoercive use of medications) can reduce the risks to the safety of
both patients and staff, using least-restrictive measures.

(7) The Occupational Safety and Health Administration in 2015 updated its “Guidelines for Preventing Workplace Violence for Healthcare and Social Service Workers”, however, this guidance is not enforceable.

(8) Nine States have mandated that certain types of health care facilities implement workplace violence prevention programs. On April 1, 2018, the Division of Occupational Safety and Health of the State of California issued a comprehensive standard (“Workplace Violence Prevention in Health Care”) that requires health care facilities to implement a workplace violence prevention plan.

(9) The Occupational Safety and Health Administration (OSHA) received two petitions for rulemaking in July of 2016, calling on OSHA to promulgate a violence prevention standard for health care and social service sectors. On December 5, 2016, OSHA issued a Request for Information (RFI) soliciting information on this issue. On January 10, 2017, OSHA conducted a public meeting to receive stakeholder input and to supplement the online comments submitted in response to the RFI. At
that meeting, OSHA announced it accepted the petitions and would develop a Federal standard to prevent workplace violence in health care and social service settings. OSHA’s spring 2019 regulatory agenda listed a Small Business Regulatory Enforcement Fairness Act Panel for Prevention of Workplace Violence in Health Care and Social Assistance.
